Subject: FW: NW Oregon Riparian Thinning Elevation- science team documents
Attachments: Appendix_A (1).pdf; Appendix_B.pdf; Appendix_C (1).pdf; Appendix_D (1).pdf; FINAL wood recruitment document.pdf; FINAL_temperature_summary_document_17-Jan-2013.pdf; preamble to SRT docs.pdf

Hi Lynne,

Attached are 3 Final documents prepared by a federal interagency Science Review Team (SRT) that summarize riparian thinning effects on stream temperature and large wood recruitment. The 4 appendices go with the stream temperature document. There is also a preamble document that describes the SRT membership and role.

The documents were prepared to help resolve agency disagreements on the effects of riparian thinning that arose during ESA consultation.

Federal land managers and regulatory agencies are still working towards agreement on ESA process issues and effects determinations.

The above documents are final and can be shared with other agencies and the public.

Take care,

Teresa
